

Case Studies

Hyde Park Hayes

Hyde Park Hayes is a 10-acre mixed-use campus that includes office buildings, a hotel, residential and retail space. Hayes is strategically located 13 miles west of central London and three miles from Heathrow Airport, with rapid access to local, national and international travel networks.

Mödel worked with the client to design and install a complete new signage and wayfinding solution for the site. We delivered internally illuminated totem units, high level illuminated site branding, vehicle and pedestrian directional units and site safety signage.

The process was overseen by our project management team and completed within a 4 week timescale.

Products
